About This Guide

This is the administrator's manual for the **Fairview School Portal**, the school-management system built on ExtraCare. It is written for principals, administrators, and office staff - not for technical staff. There is no code or technical jargon here: just what each part of the system does, who is allowed to use it, and how to carry out the everyday tasks.

The guide describes the system **as it works today**. A small number of features are still being built. Wherever that is the case, the feature is clearly marked **"Not yet available"** so you always know what you can rely on.

How to use this guide. Every chapter follows the same pattern:

- **What it's for** - a plain description of the feature.
- **How to open it** - where to find it in the left-hand menu (the sidebar).
- **Who can use it** - which staff roles can see and use it.
- **Common tasks** - step-by-step instructions for the things you will do most often.

If you only read one other chapter, read **How Access & Permissions Work** next - it explains the roles referred to throughout, and it is the key to understanding why two members of staff may see different menus.

At the very end you will find a **Troubleshooting** chapter for common problems (such as an "access denied" message or a forgotten password) and an **Appendix** summarising what each role can do.

How Access & Permissions Work

The portal shows each person only the parts of the system their **role** allows. This is why a teacher, an accountant, and a nurse all see different menus when they log in - each sees only what is relevant and permitted for their job. This keeps sensitive information (pay, medical records, exam answers) protected.

The roles, in plain terms

Throughout this guide, "who can use it" is described using these everyday role names:

Role	What they can generally do
Super User	Everything. The highest level of access in the school's portal.
Administrator	Principal, Head, and the main Admin account. Full access to school operations, fees, and user management. Does not automatically include the sensitive finance ledger and payroll unless they are also a Super User or Accountant.
Senior Admin / Manager	Vice Principal, Deputy Head, Administrative Coordinator, Head of Administration. Most administrative tools plus day-to-day fee handling.
Teacher	Teaching and academic staff. Lessons, classwork, marking, attendance, CBT tests, gradebook. No access to finance, HR administration, or system settings.
Accountant	The school's finance operator. Fees, the accounting ledger, payroll, and budgets. No access to academics.
Nurse	The confidential Medicals area only.
Facilities	The Facility Management area only.
Cashier / Storekeeper / Front-Desk Officer	Store and till sales, and viewing fees.
Librarian	The Library area only.
HR Manager	The HR area only.
Student	Their own timetable, library, classwork, CBT tests, and voting.
Parent	Their own children's attendance, report cards, fees, and feedback.

A few important points

- **A person can hold more than one role.** For example, a Principal may also act as the Accountant. Their menu combines everything their roles allow.
- **The most sensitive areas are separated on purpose.** Fee collection is one kind of access; the accounting ledger, payroll and budgets are a stricter kind, reserved for the **Super User, Accountant, and Head of Administration**. So a manager who can record a fee payment still cannot open payroll.
- **If a menu item is missing, it is not a fault** - it means the signed-in role does not have permission for it. See the Troubleshooting chapter.
- **Some staff can switch their "active role"** from the account menu (top-right) to temporarily work with a narrower set of permissions. This is separate from the "View as" preview that administrators can use to see the portal through another role's eyes.

Getting Started

Logging in

1. Open the school portal in a web browser using the school's web address.
2. Enter your email address and password, then sign in.
3. If you cannot sign in, contact your school administrator - they can reset your password (see Troubleshooting).

Finding your way around

- **The sidebar** (left-hand menu) lists the areas you are allowed to use, grouped into sections. Click a section to expand it.
- **The dashboard** (the home screen) gives an at-a-glance summary for your role.
- **The top bar** holds search, notifications, the messenger, and your **account menu** (top-right), where you can view your profile, switch your active role if available, and log out.
- **Parents and students** see personal pages such as "My Children", "My Timetable" and "My Library" instead of the administrative menus.

Everyday essentials

- **Messenger** and **News Feed** are available to everyone for school communication.
- **Notifications** (bell icon) alert you to things that need attention.
- Throughout the system, look for an **Add** or **New** button (usually top-right of a page) to create records, and the **pencil** (edit) and **bin** (delete) icons on each row.

Admin Management

What it's for

The administrator's control centre for looking after user accounts, passwords, biometric devices, and other school-wide housekeeping.

How to open it

Sidebar: **Admin Management**. It contains: Manage Deactivated Users, Manage Week Entries, Result Publish Helper, Manage User Roles & Password, Manage Biometric, and Manage Custom Field.

Who can use it

Administrators only (Super User, Principal, Head, and the main Admin account). Some items require the specific ability to manage users or roles.

Common tasks

Reset a user's password or change their roles

1. Open **Admin Management -> Manage User Roles & Password** (this opens the Users screen).
2. Find the person in the list (use search).
3. Open their record, set a new password or adjust their assigned roles, and save. The person can sign in with the new password immediately.

Re-activate a deactivated account

1. Open **Admin Management -> Manage Deactivated Users**.
2. Locate the account and choose to reactivate it.

Register or review a biometric (fingerprint) device

1. Open **Admin Management -> Manage Biometric**.
2. Use the tabs to review devices, registered users (students and staff), attendance history, and device information. Add a device by entering its details in the Device Information area.

Add a custom field

1. Open **Admin Management -> Manage Custom Field**.
2. Create a new field (for example an extra piece of information you want to record about students), choosing its name and type.

Not yet available: Manage Week Entries. This item appears in the menu but its underlying feature is still being built. It does not do anything yet.

Students & Admissions

What it's for

The complete pupil lifecycle: enquiries and admissions, the student roster, entrance exams, acceptance, and moving pupils between classes or out of the school.

How to open it

Sidebar: **Students** (Students, Manage Withdrawal, Withdrawal List, Manage Inactive Students, Manage Students Pickup, Admissions & Enquiries, Enquiry Appointment, Entrance Exams, Post Entrance Form, Acceptance Form, Promotion Manager, Transfer Manager).

Who can use it

Admission Officers and administrators for admissions and enquiries. Changing the roster (promotion, transfer, withdrawal) requires the ability to edit students, held by administrators and senior admin staff. Teaching staff can view the student list.

Common tasks

Add or find a student

1. Open **Students** -> **Students**.
2. Use search to find a pupil, or use the **Add** button to create a new student record and complete their details.

Record an admission enquiry and book an appointment

1. Open **Students** -> **Admissions & Enquiries** and add the enquiry.
2. Open **Enquiry Appointment** to schedule a visit or interview.

Run an entrance exam and process acceptance

1. Open **Students** -> **Entrance Exams** to set up and record the entrance assessment.
2. Use **Post Entrance Form** and **Acceptance Form** to progress successful candidates into enrolment.

Withdraw or reactivate a pupil

1. Open **Students** -> **Manage Withdrawal**, select the pupil, and record the withdrawal with a reason.
2. Withdrawn pupils appear under **Withdrawal List**; inactive pupils under **Manage Inactive Students**.

Promote a class or transfer pupils

1. Open **Promotion Manager** to move a year group up at the end of the session.
2. Open **Transfer Manager** to move individual pupils between classes.

Manage end-of-day pickup

1. Open **Students** -> **Manage Students Pickup** to record who is authorised to collect each pupil.

Academics: CBT (Computer-Based Testing)

What it's for

Creating and running online tests that mark themselves, with a question bank, live test sittings, results, and follow-up tools.

How to open it

Sidebar: **CBT** (CBT Setup, Admin Question Bank, Admin Test Manager, Admin Result Manager, Admin Intervention, Admin Test Remark, Admin Test Export, Admin Cbt Import, Admin CBT Reset, Live Classes).

Who can use it

Teachers, Exam Officers, and administrators. The Question Bank and Result Manager (which reveal correct answers and every pupil's scores) are restricted to staff. Students only ever see the tests they are asked to sit.

Common tasks

Build a question bank

1. Open **CBT -> Admin Question Bank**.
2. Add questions (you can also bring questions in using **Admin Cbt Import**).

Create and publish a test

1. Open **CBT -> Admin Test Manager** and create a test, choosing its questions, timing, and the class sitting it.
2. Publish it so eligible students can take it. Once results are published they feed into the gradebook.

Review and adjust results

1. Open **CBT -> Admin Result Manager** to see scores.
2. Use **Admin Test Remark** to re-mark, **Admin Intervention** to flag pupils needing support, and **Admin Test Export** to download results.
3. **Admin CBT Reset** clears a pupil's attempt so they can re-sit, if needed.

Academics: Lesson Planner

What it's for

Preparing, submitting, and approving teachers' lesson plans, with a shared setup for categories, weeks, and supervisors.

How to open it

Sidebar: **Lesson Planner** (Lesson Planner, Lesson Planner Setup, Approve Lesson Plans).

Who can use it

Teachers prepare plans; **administrators and supervisors** configure the setup and approve plans.

Common tasks

Configure the planner

1. Open **Lesson Planner -> Lesson Planner Setup**.
2. Set up categories, weeks, general settings, supervisors, and schedules. (Once a plan is published, editing can be locked depending on your settings.)

Write a lesson plan

1. Open **Lesson Planner -> Lesson Planner**.
2. Create a plan for a subject, topic and week, complete the tabs, and submit it.

Approve plans

1. Open **Lesson Planner -> Approve Lesson Plans**.
2. Review submitted plans and approve them. Scheduled reminders can be sent automatically to keep submissions on time.

Academics: Secondary School Report

What it's for

The reporting system for secondary pupils - the report-card configuration, report viewing, entering results, and the approve/publish workflow. The Nursery and Primary report sections work the same way and share these tools.

How to open it

Sidebar: **Secondary School Report** (Report Setup, Reports View, Report Entry, Approve / Process Reports, Publish Report, Mark Books & Transcripts). There are matching **Nursery School Report** and **Primary School Report** sections.

Who can use it

Administrators configure the report setup (this is a settings-level area). Report cards themselves are available to staff, and to parents for their own child.

What works today

Report Setup (partly available)

1. Open **Report Setup**. It is a tabbed configuration hub.
2. The following tabs are **live and usable now**:
 - **Terms & Sub-term** - define the school's terms (Autumn, Spring, Summer) and sub-terms (Half-Term, Full-Term), and mark which is currently active. Use **Seed** to create the standard set in one click, or **Add Term**.
 - **Comment** - define named comment slots for the report (for example a short "Classroom Behaviour" and a longer "Teacher's Comment").
 - **Result Default Comment** - pre-written comments that fill in automatically based on a pupil's score band and the teacher role.
 - **Term Begins/Ends Date** and **Attendance Setup** - for each term and sub-term, record the dates and the number of school days used to calculate attendance percentages.
 - **Deadline** - set the result-submission deadline for each term.

Report cards

1. Open **Reports View** (or **Report Cards** under Academics) to view a pupil's report.
2. Report cards are generated automatically from the marks entered against pupils (see "How report cards are generated" in Troubleshooting).

Approve and publish

1. **Report Entry** is where results are entered (this currently opens the **Exams** screen).
2. **Approve / Process Reports** moves a class's reports through the review stages.
3. **Publish Report** releases finished reports.

>

>

Not yet available (within Report Setup): the remaining configuration tabs - **Grading System, Assessment Group, Assessment, Non Assessment Comment, School Motto/Seal & Sponsor, Result Type, Result Photo Setup, Subjects For Score Exclusion,** and **Result View** - are shown but are still being built. They display a "coming soon" style message.

Not yet available (Reports View charts): the class **broadsheet** and the **Gender / Subject / Class performance charts** are planned but not built yet.

In the meantime, grading and report formatting are managed under **School Setup -> Report Config** (see the School Setup chapter).

School Attendance

What it's for

Recording and monitoring pupil attendance, including a live view derived from check-in and check-out events.

How to open it

Sidebar: **School Attendance** (Attendance Monitor, Mark Attendance, Attendance Dashboard, Attendance Setup).

Who can use it

Teaching staff mark attendance. The **Attendance Dashboard** (insights) and **Attendance Setup** (org-wide settings) are for **administrators**.

Common tasks

Mark a register

1. Open **School Attendance** -> **Mark Attendance**.
2. Choose the class and date, mark each pupil present or absent, and save.

Monitor attendance live

1. Open **Attendance Monitor** to see who is currently in, departed, or late, based on check-in/out events.

Review trends

1. Open **Attendance Dashboard** for attendance insights across the school.

Configure attendance rules

1. Open **Attendance Setup** to set the late cut-off time, maximum departure, notifications, and reason codes.

Facility Management

What it's for

Looking after the school's buildings and equipment: a facilities register, complaints, inspections, maintenance jobs, and requisitions, with reporting and an audit trail.

How to open it

Sidebar: **Facility Management** (Facility List, Facility Complaints, Facility Inspections, Facility Maintenance, Facility Requisitions, Configuration, Facility Report, Audit Trail).

Who can use it

The dedicated **Facilities role**, plus administrators and managers.

Common tasks

Add a facility

1. Open **Facility Management** -> **Facility List** and add a building, room, or asset.

Log and resolve a complaint

1. Open **Facility Complaints** and record the issue.
2. It can lead to an **Inspection**, then a **Maintenance** job, and a **Requisition** for any parts or spending needed - each has its own page.

Review activity

1. **Facility Report** summarises activity; **Audit Trail** shows the history of changes.

Finance

What it's for

The school's money: fee collection, invoices, discounts, the school store, and the sensitive back-office accounting - chart of accounts, budgets, payroll, salary advances, petty cash, bank transactions, financial statements and reports.

How to open it

Sidebar: **Finance** (Chart Of Accounts, Account Numbers, Accounts Setup, Manage Discounts, Invoice Center, Sales Monitor, Store Inventory, Warehouse, Store Pickup Unit, Store FrontDesk, Budget Mgt, Requisitions, Request Form, Direct Posts, Direct Transfer, Petty Cash, Salary Advance, Payroll, Bonus/Reduction Pack, Appointment Manager, Broad View, Fin. Statements, Cash Transactions, Reports, Fee Assignment, Fee Management, Payment Gateways, Billing & Subscription). Some fee tools also appear under **Operations**.

Who can use it - two levels

Finance is deliberately split into two levels of access:

- **Fee collection and store sales** (Fee Management, Invoice Center, Discounts, Store, Petty Cash, Cash Transactions): **administrators, managers, and cashier/store roles**.
- **Sensitive accounting** (Chart of Accounts, Budgets, Payroll, Salary Advance, Direct Posts/Transfers, Financial Statements, Broad View, Reports): **Super User, Accountant, and Head of Administration only**. These are kept apart so that being able to take a fee payment does not give access to the ledger or payroll.

Common tasks

Assign and manage fees

1. Open **Finance** -> **Fee Assignment** to set which fees apply to which classes.
2. Open **Fee Management** to review and manage the fees themselves.

Record a fee payment and issue an invoice

1. Open **Invoice Center** to create and manage invoices.
2. Record payments against invoices; parents can also view and pay their child's fees from their own login.

Apply a discount

1. Open **Manage Discounts** and record the discount for the pupil or fee (discount approval follows the school's process).

Run payroll (sensitive)

1. Open **Finance** -> **Payroll** (Accountant / Head of Administration / Super User only).
2. Prepare the payroll run. **A two-person rule applies: the person who approves a run cannot be the person who created it.**

Review the school's finances (sensitive)

1. **Broad View** gives a wide financial overview.
2. **Fin. Statements** and **Reports** provide statements and detailed reports.

HR Manager

What it's for

The staff/human-resources centre: staff records, leave, staff attendance, recruitment, discipline, performance, training, and confirmations - plus self-service pages every staff member can use for their own information.

How to open it

Top of the sidebar: **HR Manager**, with self-service links below it - **My HRM Info**, **My Leave**, **My Attendance**, **My Actions** - and the admin link **Leave Admin**.

Who can use it

The **HR Manager** role and **administrators** for the administrative HR tools. **Every staff member** can use the personal "My..." pages for their own leave, attendance, and records.

Common tasks

View your own HR information

1. Open **My HRM Info** to see your staff record.
2. Open **My Leave** to request leave and see your balance; **My Attendance** for your own clock log; **My Actions** for any disciplinary matters concerning you.

Administer leave

1. Open **Leave Admin** (HR/administrators) to review and approve staff leave requests.
2. Configure leave types and assign entitlements from the leave configuration screens.

Other HR administration

1. From the HR Manager area, administrators can manage recruitment, disciplinary cases, performance reviews, training, and staff confirmations. These areas hold confidential information and are restricted to HR and administrators.

Teachers

What it's for

Viewing the school's teachers and assigning them to the school/subjects.

How to open it

Sidebar: **Teachers** (View Teachers, Assign To School).

Who can use it

Administrators only.

Common tasks

View teachers

1. Open **Teachers** -> **View Teachers** to see the list of teaching staff. You can export the list.

Assign a teacher

1. Open **Teachers** -> **Assign To School** to link a teacher to the school and manage subject assignments (one teacher per subject).

Pastoral & Welfare

What it's for

The pastoral, boarding, behaviour, and welfare centre - a pastoral dashboard, boarding/hostel life, merit points and awards, disciplinary cases, exeat (leave-of-absence) requests, mentor reports, and a pastoral report per pupil.

How to open it

Sidebar: **Pastoral & Welfare** (Pastoral Dashboard, Pastoral Setup, Pastoral Students, Point Entry, Points Analysis, Pastoral Care, Photo Journals, Weekly Remarks, Merit & Awards, Hostel / Boarding, Hostel Students, Hostel Life, Hostel Reports, Pastoral Report, Exeat Requests, Mentor Reports, Behaviour & Sanction).

Who can use it

Pastoral and boarding staff, and administrators. Boarding pages use a boarding permission; points, awards, and discipline use a behaviour permission.

Common tasks

Set up the pastoral module

1. Open **Pastoral Setup** - a tabbed hub covering hostel setup (managers, life grades, comment bank), houses, disciplinary setup (sanction groups, actions, committees), leadership roles, pastoral heads, exeat settings, roll call, point and award systems, and default settings.

Award or deduct merit points

1. Open **Point Entry**, choose the pupil, the point type and term, enter the points (use a negative number for a demerit), and record it.
2. **Points Analysis** shows each pupil's points broken down by term.

Manage boarding

1. **Hostel / Boarding** manages boarding houses and bed allocation.
2. **Hostel Students** lists boarders (with a bulk import). **Hostel Life** records per-boarder comments and grades. **Hostel Reports** holds daily and manager reports.
3. **Pastoral Roll Call** (in Pastoral Setup) marks boarders present/absent per session.

Handle discipline and exeat

1. **Behaviour & Sanction** records disciplinary cases (offence, sanction, committee, status).
2. **Exeat Requests** manages a boarder's request to leave campus; approving an exeat is a safety-sensitive action reserved for administrators.

Build a pastoral report

1. **Pastoral Report** brings together a pupil's points, hostel life, discipline, and remarks; you can add a termly remark using the remark bank.

News Feed

What it's for

The school's internal social feed for announcements, posts, photos, and documents.

How to open it

Top of the sidebar: **News Feed**.

Who can use it

Everyone who is signed in.

Common tasks

Post an update

1. Open **News Feed** and create a post. You can attach a photo or a document (documents appear as a "View Document" card).
2. Depending on settings, posts can be targeted to particular audiences.

eClassroom (Virtual Classroom)

What it's for

The virtual/online classroom: programmes, classroom management, and live broadcasts. (The older "eClassroom" for classwork is now called **Classwork** under Academics.)

How to open it

Sidebar: **eClassroom** (eClassroom Setup, Programs, Admin Manage eClassrooms, Admin Live Broadcast).

Who can use it

Administrators and teachers. Students reach only their own classwork, not the admin tools.

Common tasks

Set up and run a virtual classroom

1. Open **eClassroom** -> **eClassroom Setup** and **Programs** to configure offerings.
2. Use **Admin Manage eClassrooms** to manage sessions and **Admin Live Broadcast** to run a live class.

Payment Gateways

What it's for

Storing the school's online-payment provider credentials (such as Remita, Flutterwave, and Paystack) so that online fee payments can be processed.

How to open it

Sidebar: **Finance -> Payment Gateways**.

Who can use it

Super User and the main Admin account (org_admin) only. This is kept separate from ordinary fee access because it involves secret payment keys - an accountant or manager who handles fees cannot open it.

Common tasks

Add or update a gateway

1. Open **Finance -> Payment Gateways**.
2. Choose a provider, enter its keys/credentials, and save. Existing secrets are shown as hidden (-----) once set.

Partly available. You can store credentials for all listed providers today. However, **some providers are marked "not yet live"** - their details can be saved, but they are not yet wired up to process live payments. A badge on the provider makes this clear.

Classes & Year Groups

What it's for

Defining the school's classes and year groups.

How to open it

Sidebar: **Classes/YearGroups** (Manage YearGroups, Manage Class).

Who can use it

Teaching staff and administrators (viewing); administrators to create and edit.

Common tasks

1. Open **Manage YearGroups** to create year groups, and **Manage Class** to create classes within them.

Subjects

What it's for

Maintaining the list of subjects taught in the school.

How to open it

Sidebar: **Academics** -> **Subjects**.

Who can use it

Teaching staff and administrators.

Common tasks

1. Open **Academics** -> **Subjects** and add or edit subjects.

Exams & Gradebook

What it's for

Recording exam sittings and marks, and viewing the gradebook that feeds report cards.

How to open it

Sidebar: **Academics -> Exams & Results** and **Academics -> Gradebook**.

Who can use it

Teaching staff and administrators.

Common tasks

Set up an exam and enter marks

1. Open **Academics -> Exams & Results**, create an exam for a class and subject, and enter pupils' marks against it.

View the gradebook

1. Open **Academics -> Gradebook** to see grades. Grades marked as published are the ones that appear on report cards.

Publish grades

1. Use the publish option in the gradebook (or **Result Publish Helper** under Admin Management) to release grades. Only administrators/managers can publish.

TimeTable

What it's for

Building the school timetable - periods, activities, schedules, an automatic timetable generator, curriculum, and subject attendance.

How to open it

Sidebar: **TimeTable** (TimeTable Setup, Manage Periods, Manage Activities, Manage Schedules, Time Tabler, Manage Lesson Plans, Manage Curriculum, View Subject Student Attendance).

Who can use it

Teaching staff and administrators.

Common tasks

1. Open **TimeTable Setup**, then define **Periods** and **Activities**.
2. Build the grid under **Manage Schedules**, or use **Time Tabler** to generate one automatically.
3. **Manage Curriculum** and **View Subject Student Attendance** support the timetable.

Voting System

What it's for

Running staff-awards voting and ratings.

How to open it

Sidebar: **Voting System** (Rating Setup, Manage Rating, Voting Setup, Manage Votes, My Votes).

Who can use it

Administrators set up and manage votes; **eligible voters** (including students where eligible) reach **My Votes** to cast their vote.

Common tasks

1. Open **Voting Setup** and **Rating Setup** to configure a vote or rating.
2. Open **Manage Votes** / **Manage Rating** to run them and see the tally.
3. Voters open **My Votes** to participate.

Clubs

What it's for

Managing school clubs, memberships, enrolment, and club assessment.

How to open it

Sidebar: **Clubs** (Manage Clubs, Membership List, Club Enrollment, Club Assessment).

Who can use it

Teaching staff and administrators.

Common tasks

1. Open **Manage Clubs** to create clubs (with capacity and enrolment rules).
2. **Club Enrollment** handles joining (with approval where required); **Membership List** shows members; **Club Assessment** records club grades.

Feedback

What it's for

Collecting and managing feedback, daily reports, and a simple CRM view of admission contacts.

How to open it

Sidebar: **Feedback** (Feedback Settings, Feedback Form, My Feedback, Feedback Manager, Daily Report, Student Daily Report, CRM).

Who can use it

Everyone can raise and view their own feedback (**Feedback Form**, **My Feedback**). **Settings** and **Feedback Manager** are for staff with feedback-management permission. **Daily Report** and **Student Daily Report** are staff surfaces; **CRM** uses admissions data.

Common tasks

1. Anyone: open **Feedback Form** to submit feedback and **My Feedback** to track it.
2. Staff: open **Feedback Manager** to respond, and **Daily Report** / **Student Daily Report** to log daily notes (a student daily report is visible to that pupil's parent; a general daily report is visible only to its author and managers).
3. **CRM** shows admission contacts as a light contact view.

Behaviour Tracker

What it's for

The school-wide behaviour taxonomy and conduct-points configuration that sits behind the pastoral merit/award tools.

How to open it

Sidebar: **Behaviour Tracker** (Manage Behaviour Tracker, Sub-manage Behaviour Tracker, Manage Awardings, Manage Behaviour Levels, Behaviour Tracker Settings).

Who can use it

Teaching/pastoral staff and administrators.

Common tasks

1. Open **Manage Behaviour Tracker** and **Sub-manage Behaviour Tracker** to define behaviour categories and sub-categories.
2. **Manage Behaviour Levels** defines conduct bands; **Manage Awardings** is the merit/awards view; **Behaviour Tracker Settings** holds the options (the detailed taxonomy is optional to use).

Medicals

What it's for

The confidential student-health area - a medical dashboard, records, and analysis.

How to open it

Sidebar: **Medicals** (Medical Dashboard, Manage Medicals, Medical Analysis).

Who can use it

The Nurse and administrators only. This is confidential and deliberately closed to general teaching staff.

Common tasks

1. Open **Manage Medicals** to record and view a pupil's medical records.
2. **Medical Dashboard** and **Medical Analysis** summarise health information.

Library

What it's for

The school library - catalogue, issuing and returning books, users, setup, and reviews.

How to open it

Sidebar: **Library** (Admin Dashboard, Manage Catalogue, Issue / Return Book, User Dashboard, Library Setup, Manage Reviews).

Who can use it

The **Librarian and administrators**. Students can browse via **My Library**.

Common tasks

1. Open **Manage Catalogue** to add books; **Issue / Return Book** to lend and take back.
2. **Library Setup** holds settings, categories, locations and borrowing rules; **Manage Reviews** moderates pupil reviews.

Cooperative

What it's for

The staff cooperative (savings/loans) console, dashboard, and reports.

How to open it

Sidebar: **Cooperative** (Cooperative Console, Cooperative Dashboard, Cooperative Reports).

Who can use it

Staff with fee/finance-write permission (administrators, managers, finance staff).

Common tasks

1. Open **Cooperative Console** to administer the cooperative, **Cooperative Dashboard** for an overview, and **Cooperative Reports** for reporting.

Operations

What it's for

Day-to-day operational services: transport, the tuckshop, bulk SMS, the calendar/planner, and visitor management.

How to open it

Sidebar: **Operations** (Transport, Tuckshop, Bulk SMS, Calendar & Planner, Visitor Management).

Who can use it

Administrators for most items. The tuckshop till can be operated by till/store staff. Bulk SMS and transport are administrative.

Common tasks

Transport

1. Open **Operations** -> **Transport** to manage routes and transport records.

Tuckshop

1. Open **Operations** -> **Tuckshop** to run the tuckshop till and sales.

Bulk SMS

1. Open **Operations** -> **Bulk SMS** to send text messages to parents/staff.

Calendar and visitors

1. **Calendar & Planner** manages school events; **Visitor Management** logs visitors (a safeguarding feature).

Wallet Manager & PocketMoney

What it's for

Two connected money tools: **Wallet Manager** (a parent wallet) and **PocketMoney Manager** (a pupil's spending wallet and item catalogue).

How to open it

Sidebar: **Wallet Manager** (Wallet Manager) and **PocketMoney Manager** (PocketMoney, PocketMoney Items, New Transaction).

Who can use it

Administrators and finance staff for the wallet and item catalogue. The spending surface (PocketMoney) is for **till/finance staff** who ring up spends.

Common tasks

1. Open **Wallet Manager** to manage the parent wallet.
2. Open **PocketMoney** -> **PocketMoney Items** to manage the catalogue of items a pupil can spend on, and **New Transaction** to record a spend.

Not yet available: automatic bank top-ups (dedicated virtual account / gateway funding) are deferred; those specific controls are shown but disabled.

Staff Management

What it's for

People-focused school tools beyond core HR: staff records, staff assessment, a talent pool, a parents directory, and teacher ratings.

How to open it

Sidebar: **Staff Management** (Staff, Teacher Ratings, Parents Directory, Setup Staff Assessment, Staff Assessment, Manage Staff Assessment, Talent Pool).

Who can use it

Administrators and HR for staff assessment and the talent pool (confidential). **Parents Directory** (guardian contact details) is staff-only. **Teacher Ratings** is administrative.

Common tasks

1. Open **Setup Staff Assessment** to configure the assessment, **Staff Assessment** to complete assessments, and **Manage Staff Assessment** to review them.
2. **Talent Pool** tracks candidates; **Parents Directory** lists guardian contacts; **Teacher Ratings** records teacher ratings.

School Setup

What it's for

The school's core configuration: school types/sections, academic sessions, houses, grading bands, and the current report configuration.

How to open it

Sidebar: **School Setup** (School Types, Manage Sessions, Houses, Grading Bands, Report Config).

Who can use it

Administrators only (settings level).

Common tasks

Manage sessions and mark the current one

1. Open **School Setup -> Manage Sessions**, add the academic session, and mark the current one - this "current session" is used across the system.

Configure sections, houses, and grading

1. **School Types** manages the school's sections/levels; **Houses** manages school houses; **Grading Bands** manages grade boundaries.

Report Config

1. **Report Config** is where report formatting, grading scales, per-level templates, and assessment settings are managed today (until the new Report Setup hub is fully built - see the Secondary School Report chapter).

Messenger, Notifications & Analytics

Messenger

- **What it's for:** direct messaging between staff.
- **How to open it:** top of the sidebar, **Messenger**.
- **Who can use it:** all signed-in staff.

Notifications

- **What it's for:** alerts about things needing your attention.
- **How to open it:** the bell icon in the top bar, or **Notifications** in the sidebar.
- **Who can use it:** everyone.

Analytics

- **What it's for:** school-wide insights and dashboards.
- **How to open it:** sidebar, **Analytics**.
- **Who can use it:** staff with analytics permission (administrators, managers, teachers, HR).

Billing & Subscription

What it's for

The school's own subscription to the ExtraCare platform (the school's account with the software provider) - plan and billing details.

How to open it

Sidebar: **Finance** -> **Billing & Subscription** (also reachable from the account area).

Who can use it

Administrators (settings level).

Common tasks

1. Open **Billing & Subscription** to review the school's plan and billing information.

Troubleshooting

"You do not have access" / "Required permission ..."

This message means your signed-in role does not have permission for that page - it is not a fault.

- Check the account menu (top-right): are you signed in as the right person, and is your **active role** the one you need? If you switched to a narrower role, switch back.
- If you genuinely need access, ask a **Super User or administrator** to add the appropriate role to your account (Admin Management -> Manage User Roles & Password).

A menu item I expected is missing

The sidebar only shows what your role permits. If an item is missing, your role does not include it - ask an administrator to review your roles. (A very small number of items are still being built and are marked "not yet available" in this guide.)

How report cards are generated

Report cards are built automatically from the information already in the system - you do not type the card by hand:

1. **Marks** are entered against pupils through **Exams & Results / Gradebook** and **CBT** (published results feed in automatically).
2. Each subject's score, grade, class position, and averages are calculated from those marks.
3. **Attendance** and the **comments** (class teacher / head teacher) come from the report details and the comment settings.
4. Staff then **Approve / Process** and **Publish** the reports; parents and pupils see the published card.

If a report looks empty, the usual cause is that grades have not been **published**, or marks have not been entered for that term.

Resetting a password

1. An administrator opens **Admin Management -> Manage User Roles & Password** (the Users screen).
2. They find the person, set a new password, and save. The user can sign in immediately with the new password.

(For security, the system does not email passwords; an administrator sets them directly.)

A page says "not found" after a recent update

When the system has just been updated, both the main system and the screen you use are refreshed separately. If a brand-new page or menu item briefly shows "not found," it usually means the update is still being applied - wait a short while and try again, or ask your administrator to confirm the update has finished.

Parents or students can't see something they should

Parents and students only see their **own** information (their children / their own timetable, fees, report card). If a parent cannot see a child, check that the parent is correctly linked to that pupil in the pupil's record.

Sensitive finance areas are hidden

Payroll, budgets, the accounting ledger, statements and reports are restricted to **Super User, Accountant, and Head of Administration**. Holding fee-collection access is not enough - this separation is intentional.

Appendix: Role Reference

This table summarises, in plain terms, what each role can typically reach. A person may hold more than one role, in which case their access combines.

Role	Can typically use
Super User	Everything, including sensitive finance and payment gateways.
Administrator / Principal / Head	All school operations, fees, users, and settings; not the sensitive finance ledger/payroll unless also Super User or Accountant.
Vice Principal / Deputy Head / Admin Coordinator	Most administrative tools and fee handling.
Head of Administration	Manager tools plus viewing and drafting sensitive finance (budget, payroll, ledger) - but not final payroll approval.
Teacher / Instructor / Academic Coordinator	Academics, attendance marking, CBT, lesson plans, gradebook. No finance, HR admin, or settings.
Exam Officer	Exams, CBT administration, and read-only reports/grades, plus the class lists they need.
Admission Officer	Admissions and enquiries, plus the student list.
Guidance Counsellor	Behaviour and feedback, plus the student list.
Accountant	Fees, the accounting ledger, payroll, salary advances, and budgets. No academics.
Cashier / Storekeeper / Front-Desk Officer	Store/till sales and viewing fees.
HR Manager	The HR area (staff records, leave, recruitment, etc.).
Librarian	The Library area.
Nurse / School Nurse	The confidential Medicals area only.
Facilities / Facility Manager	The Facility Management area only.
Support staff (driver, janitor, kitchen, etc.)	Self-service only - their own profile and leave.
Student	Own timetable, library, classwork, CBT tests, voting.
Parent	Own children's attendance, report cards, fees, and feedback.

End of guide.
